

Firm Overview

4th Quarter 2017

About 1607 Capital Partners:

1607 Capital Partners is an independently owned, boutique investment firm located in Richmond, Virginia. The firm specializes in investing across multiple asset classes using closed-end funds and other similarly discounted investment vehicles. The investment principals of the firm have, on average, nearly two decades of experience specific to the closed-end fund universe. The firm manages assets primarily for institutional clients, as well as ultra high net worth individuals, through separately managed accounts and commingled limited partnerships.

Investment Philosophy:

1607 Capital Partners uses a unique, bottom-up, value-oriented approach to evaluate closed-end funds across multiple asset classes. Few other firms employ this process and the 1607 investment team has identified key inefficiencies within the closed-end fund universe that have consistently created value over the last several decades. The firm's philosophy is based upon the belief that discounts and/or premiums will tend to revert to the mean over the long-term. Hence, the investment team purchases funds when discounts look attractive to their own history and sells when they look expensive.

Closed-End Funds Definitions and Key Highlights:

What exactly is a closed-end fund?

Closed-end funds (CEFs) are actively managed investment vehicles. Each fund has its own unique investment objective. Shares of CEFs are created through an initial public offering (IPO), after which they trade on a major stock exchange, similar to common stocks. As a result of trading on an exchange, CEFs will have both a market price and a net asset value (NAV). Market prices fluctuate based on supply and demand and typically trade above (premium) or below (discount) the fund's NAV. (Source-Closed-end Fund Association website: www.closed-endfunds.com)

Advantages of CEFs

- **Discounts:** The single most unique feature of closed-end funds is the ability to buy a dollar's worth of assets for less than a dollar. Perhaps even more important though is that these discounts tend to be volatile rather than static. 1607 Capital's core investment philosophy is built upon the ability to take advantage of this volatility.
- **Liquidity in illiquid markets:** By only purchasing funds traded on the most liquid, highly regulated markets (U.S., U.K., Canada, and Australia), we are able to bypass many of the liquidity constraints and regulatory restrictions that might exist in trying to purchase a portfolio consisting of all of the underlying holdings. This is of particular importance when buying funds that invest in less developed global markets.
- **Diversification:** With a few exceptions, most funds in our investable universe are diversified investment portfolios. Therefore, a portfolio with 50 to 90 funds might hold as many as 2,000 to 3,000 individual underlying securities, essentially eliminating any security specific risk.
- **Access to quality managers:** While not every active manager in the marketplace offers a closed-end fund, many do. Top quality managers range from the very large to the smaller boutique manager. The ability to invest with these quality managers at a discount can be very attractive.
